# INTRODUCTION

The Strategic Action Plan 2017, was agreed by the STEP Project Board in January 2017. It provides a clear statement of the team's vision, values and priorities, outlining key areas of our service delivery, agreed objectives and proposed projects. The five-year Delivery Plan sets two key values and a number of projects. Each project has individually linked outcomes, to be achieved by the Partnership and its members.

As part of the Department of Communities and Local Governments commission for Coastal Community Teams, it was agreed that a Delivery Plan be produced identifying clear and specific activities that can be delivered within the five-year proposition, and work towards the achievement of the outcomes for this community set out in the Strategic Action Plan.

The Project Delivery Plan for 2017-22 therefore sets out:

- How we will embed our two key functions in the completion of our projects to ensure that we are:
  - delivering projects identified by the town
  - providing support within the partnership network, across all sectors
  - working together for primarily the benefit of St. Anne's on the Sea
- How we will measure our success in achieving the outcomes sought for this community
- The key actions that will be taken to support us to achieve these outcomes
- The way in which our resources and infrastructure will be developed to support our partners to deliver the projects

The STEP Project Board recognises that there are a number of potential constraints and assumed perceptions which may jeopardise the achievement of its vision and priorities. These can include financial risks, risks to projects, risks from missed opportunities and risks to the reputation of the Partnership. Failure to manage these risks effectively would affect performance across all projects and activities. For this reason, risk management is a key element of the partnerships' governance and is integral to the successful achievement of the Strategic Plan. Our progress in achieving the actions and outcomes set out in the Project Delivery Plan for 2017-22 will be continuously monitored and reported on a quarterly basis at the Public STEP Update Sessions and to the Project Board to ensure that they are managed.

## STEP'S TWO KEY FUNCTIONS

### *ACHIEVEMENT OF PROJECTS*

St. Anne's Enterprise Partnership has established multiple projects to achieve in the period 2017-22. Within each project the Partnership seeks to attain several outcomes or improvements for the town of St. Anne's on the Sea. This part of the delivery plan considers each of these outcomes and sets out actions to work towards achieving them during the current year. It is also important for the Partnership to be able to understand whether the actions it takes are making a difference for the community.

So, this Plan also sets out several indicators that can be used to gauge or quantify the impact of these actions or to consider well-being or quality of life. These indicators will:

- help us to assess progress for each outcome
- to plan future projects
- to develop future ideas for the benefit of the town

### *EMBEDDING OUR VALUES*

St. Anne's Enterprise Partnership has three key values:

- delivering projects identified by the town
- providing support within the partnership network, across all sectors
- working together for primarily the benefit of St. Anne's on the Sea

This section of the Delivery Plan is dedicated to specific actions that will develop and embed these values across the partnership. The actions included for the delivery of projects will be confirmed through the Theme Groups engaging the residents and businesses of the town. To provide support across all sectors we will ensure that members of the project board remain diverse and cover all areas of the community.

To ensure that we work together for the primary benefit of the town we will ensure that all project board members personal interests are declared and the partnership continues to be open and transparent.

## EMBEDDING OUR VALUES

Our plan sets out the values that the Partnership will operate by in the delivery of projects, the achievement of its priorities and in its decision making. This section of the Project Delivery Plan is dedicated to developing and embedding these values across the entire partnership. The satisfaction of the town's residents and their perceptions of the partnership will provide important indicators of how STEP is seen to be progressing these values.

We will look to negate the apathy associated with group partnerships and independent bodies within the local community by ensuring we continually interact and communicate at all stages. STEP will give quarterly public update sessions detailing the objectives, activities and achievements within the previous quarter year and the proposed activities to be undertaken in the subsequent three months.

In addition to the actions set out for each project, the partnership will undertake the following actions for the two key values that it seeks to follow:

### *Delivering Projects that are identified by the town*

- All projects undertaken by the partnership will be approved by the project board.
- All projects engaged within each relevant Theme Group will be overseen by the Theme Group Leader.
- All projects engaged within each relevant Theme Group will be agreed by the Theme Group members.
- Project ideas and proposals will be formulated from consultations and discussions at Annual Meetings.
- Details of proposed ideas will be categorised with the STEP Strategic Action Plan and shared via the Enterprise Partnership website.
- At all stages STEP will welcome and encourage discussion and feedback and take all correspondence under careful consideration.

<b>Actions to be completed</b>	<b>Responsibility</b>	<b>Timescale</b>
1. Introduce new ways for residents and partnership members to engage with the Group. Seek to develop new approaches to social media engagement. Improve and redevelop website.	D. Treece-Birch / A. Ames / A. Joynt / J. Nightingale	September 2017
2. Personal monthly engagement from Chairman / Rolling news updates / Newsletters	All Project Board	September 2017

### *Providing support within the partnership network, across all sectors*

The St. Anne's Enterprise Partnership has increased in membership size from May 2016 with 34 members to May 2017 with 192 members. As with most groups of this nature the membership is divided between those who are active and involved and those who choose to receive information updates. It is a goal of the partnership to continue to grow its membership according to the following guidelines:

- o Ensure there is diversity of members across all sectors
- o Everyone is treated fairly and equally in accordance with Public Sector Equality Duties
- o There is no bias to any gender, religion or sexual orientation
- o The weighting of proposed projects is based upon demand and not distributed evenly to engage each Theme.

<b>Actions to be completed</b>	<b>Responsibility</b>	<b>Timescale</b>
1. Target for membership expansion to exceed 300 by May 2018, through honest engagement and delivery of set projects.	Project Board / Members	May 2018
2. Projects and Ideas submitted by organising external bodies will be given full understanding on the reach and limitations of what the partnership can offer in support. Due diligence to be followed to ensure no miscommunication or false perceptions result in a risk to the group's integrity and transparency.	All Project Board	Ongoing

### *Working together for primarily the benefit of St. Anne's on the Sea*

The main objective of the partnership is to improve the standards, conditions, economic climate, health and well-being of the town of St. Anne's on the Sea. Whilst it is desirable and acceptable for all businesses and individuals involved in the partnership to seek benefits by default of being associated with the collective community, it is STEP's main driver that the focus is primarily on an improvement for all before individual gain.

The active members and particularly the Project Board membership is made up of voluntary positions. It is a trait and characteristic of volunteers that their conscientiousness is built on a precondition for improving conditions for all.

As a DCLG Coastal Community Team the boundary of responsibility and commitment is to the town of St. Anne's on the Sea. When applicable partnerships with neighbouring Coastal Teams are seen to be relevant as they may have a substantial individual benefit to the town, and therefore it would be irresponsible not to pursue these.

<b>Actions to be completed within 2017/18</b>	<b>Responsibility</b>	<b>Timescale</b>
1. Work on improving and developing contacts with neighbouring Coastal Community teams to gain additional support and advice across the Fylde Coast and to liaise and share successes.	Project Board	April 2018
2. The Board will continue to lead by example in their work ethic towards helping and supporting endeavours within the partnership and by colleagues and organisers from other parties.	Project Board	Ongoing

# Engagement Levels for St. Anne's Enterprise Partnership

## *Levels of Engagement*

The project board identified five levels of engagement for the Enterprise Partnership. These levels establishment the involvement and ownership of activities within the town and allow clear delineation and illustration of their involvement.

1. Managed by
2. Supported by
3. Endorsed by
4. Instigated/set-up by
5. Sponsored by

If the partnership is involved in any of the five engagement levels, the STEP logo should be used when the respective organisers identify their partners (when applicable) on their promotions and marketing.

Projects in the following section will be listed within the Theme Group Categories and colour coded in alignment with the Strategic Action Plan document.
